

MICRO PRIMER

Product Description

Rough and granulated primer with addition of quartz sand intended for improving the bonding between smooth, little absorbing surfaces and the plaster. Can be applied on smooth wall surfaces such as smooth concrete, plaster board, plaster, cement board and wall paint. Micro primer adheres to the surface, strengthens it and creates a much rougher texture enabling a much better mechanical bonding of further plaster coat.

Surface Preparation

Clean the surface to remove dust, dirt or loose paint and to obtain a stable infrastructure. For old exterior walls rinse the wall surface by high pressure water machine at least 150 atmospheres and wait until the surface is completely dry.

Application

The product is ready to use. Apply with a roller, brush or a sprayer. Wait at least 6 hours before applying a further coat. Ensure complete coverage of the surface.

Clean-up

Tools can be cleaned with soap and water after use.
